HAMILTON HOLT SPEAKS FOR LEAGUE OF NATIONS

Makes Great Impression on Students ---Was Correspondent at Versailles.

'Monday at assembly a man talked who, seedy looking at first, turned out to be the one of the most interesting and worthwhile speakers heard at the University this year.

The man was Hamilton Holt exeditor of the New York Independent. and now spending his efforts in behalf of the League of Nations. Mr. Holt was one of the chief American correspondents at Versailles, and spoke of the meeting there as few men can speak.

In part, Mr. Holt said that war was effective, but had ever been indicted by morality, religion, biology and economics. He said "we must sub stitute reason for force."

Mr. Holt made a stronger case for the League than any speakers heard thus far, and his message was received with eager attention on the part of the students. He closed with a parshe in which the world was verne spried as a village and the Chitel street was organized to put out the frequent conflagrawhich had recently been so disastrous, but Sam refused to come in, in common with Fritz and Ivan and eight or nine no-accounts of the village. Mr. Holt ended unexpectedly with "Did Sam do right?"

UNCONSCIOUS SNOBS.

Snobs are the self-constituted four hundred. Unconscious mobs are those who give the impression of self-satisfaction without feeling it.

The University of Omaha has few snobs. In a college atmosphere self-righteousness has a hard struggle for existence. But we have a number of "unconscious snobs," students who give the impression of exclusiveness.

There are several "whys" of an unconscious snob. One is that he is naturally reserved, that he has the "only child's" difficulty in becoming a good mixer. Another is that he is self conscious, and inarticulate when he wishes to express sympathy. And the third reason, born of this is that he feels that he himself is being highbrowed. So in sheer self preservaive instinct, he stiffens his own attitude. He has become in

the eyes of the world a first class snob.

It you week that you are being highbrowed it was a rear snow, or not here the highbrow is a rear snow, or you here to a little unconscious snobbery n vourself.

DON'T DODGE THE OPPORTUNITY.

Wanted: People who smile and smile continually; people who are vitally concerned with the cause of the school! We have suggestions to such a school spirit on our campus and in our class rooms now. Why not further the iden? Cheery smiles and kind words are usually much more effective than eloquent expressions and patronizing airs, especially in the minds of first semester students. Shall we immediately make them feel at home and at ease, thus promote the idea that they school?

The prospets of our school are great; we are assured of this by Dr. Wilder, Dr. Foster and others. The advantages and opportunities can easily be developed to the best end when students take individual responsibility and when every one becomes greatly interested in the common cause.

Let us keep our minds spinning with plans which will stimulate everyone's enthusiastic interest in our school's progress. It behooves us to hustle and to make use of our initiative. Let us remember too, that if we export the principles of the U. of O. they will become more realistic and emphatic at home. Let us be a friend and a promoter.

THANK YOU, VISITORS.

There are two things in the world, facts and inspirations. Facts are all right. Verily we often hear this called a world of facts. But facts can get monotonous, especially to students who spend most of their time accumulating them. Besides, facts are readily forgotten.

It is only the inspiration then, of our school life that we will retain. Regular source of this is the personality of pro-

fessor and student friendship.

Other inspirations come from speakers of outside fame. We have Dr. Foster, Ben Carrington and George Collins to thank for goodly inspirational additions—to cash on hand.

STEPHANIE

VERY unusual name is Stephanie. A Of late it has had great vogue and represents a revival of interest in the old Greek names which had far more significance than our modern versions. Stephanie, for instance, originated with the Greek games when the wreath of the conqueror was an appropriate allusion to those games where the Greek youth delighted to contend. The wreath was called a stephanos, and it is more than likely that the first proper name Stephanos was so called by a proud family whose representative had returned with a leafy crown on his brow.

Stephan, the contraction, was an old Greek name borne by the son of Thucydides, before it was given to the Hellenist deacon who achieved the greatest of all victories and won the spiritual crown. Old Greek hymn writers celebrated this accordance of name and destiny:

Thou by name a crown impliest Meekly then in pangs thou diest; For the crown of righteousness.

Stephanie is the feminine form approved in Greece; it also signifies a crown. It received a sacred prominence since no less than seven saints bore the masculine form of it, including the great Saint Stephen the martyr. The English gained its use, it is said, through William the Conqueror, who dedicated to Saint Stephen the abbey built at Caen to explate the marriage with the aiready betrothed Matilda.

The English have placed the stamp of their own spelling upon it, and while using Stephanie to a large extent; also favor Stephana. The French call her Estephanie, Stefanie, Etiennette, and Tiennette. Estephania is the Portuguese form and Stephanine, the German. Russia changes her to Stephanida and Stepanida.

Stephanie's jewel is the sapphire which will protect her from all harm, and is said to attract divine favor to its wearer. Her lucky day is Wednesday and 3 is her lucky number.

The Why Superstitions

By H. IRVING KING

PLANTING PEPPERS

OLD-FASHIONED farmers in some sections of the country will assure you that if you want to have your pepper plants do well you should have them set out by a red-headed person. Same thing if you grow the plants from the seed-get a red-haired person to sow the seed. Some say a quick-tempered, irritable person, even if he is not red headed, will do as well. This is a clear case of sympathetic magic applied to agriculture and the application of sympathetic magic to agriculture is not only one of the oldest, if not the very oldest, phases of the mental development of primitive man, but is one which exists in the form of various superstitions all over the world today.

In some parts of Europe the peasants at planting time leap high in the air in the sown fields in order that the crops may grow high; in another a sower of wheat wears a golden ring in order that the grain may have a rich, golden color and a stone, wrapped in a white rag, is placed among the cabbages in order that they may "head up" white and hard; while in Sumatra the rice is sown by women with their hair hanging loose in order that the cereal may grow luxuriantly and have long stalks.

Instances of similar practices might be multiplied almost indefinitely. All are inheritances from the primitive: the persistence of primitive magic into the Twentieth century, subsisting side by side with colleges of agriculture.

MURIEL

THE quaintly demure Muriel is one Tof the oldest and most beloved of English names. Its earliest form, Meriel, is still in common usage "myrrh," abroad. It signifies precious perfume of early Biblical days, and a special reverence attaches to the name, since myrrh was one of the gifts brought by the Wise Men to the new-horn Babe in the manger at Bethlehem.

Seldom in the history of etymology has a name preserved its original identity 50 faithfully as Muriel. It has suffered no change, since Meriel was first taken from the Greek word meaning myrrh. Nor did it leave its native heath to undergo transformation by another language. No other country has an equivalent; even America transported it intact.

The moonstone is Muriel's talismanic gem. According to an old legend, it will endow her with the purity and beauty of the moonbeams which the ancients believed were imprisoned in the stone. It is likewise said to give her the gift of prophetic vision whereby she may read the future. Sunday is her lucky day and 2 her lucky number. The cornflower is her special bloom.

Something to Think About By F. A. WALKER

SELF-ADMIRATION

I'll is not always those persons who admire themselves most, who think themselves beautiful, talented or witty, who succeed in winning admiration from others.

In this egotistic stage of feeling there is a distinct emotion of complacency with respect to self, accompanied with pride which usually distorts the mental faculties and dulls the vision.

To regard yourself with respect is commendable, but to shape your life and actions so that others shall pay you homage is far more desirable.

When you praise yourself before the mirror there is but one critic, a slave to your whim, bound to obey your slightest wish.

The world is more daring, and openly disregards the commanding emotions of the individual and speaks more plainly.

It gets rather close to the truth, which is uttered more or less bluntly, quite regardless of your feelings.

So if by any chance your exalted opinion of your good looks and fine capabilities should succeed in winning the world's approbation, you may rest assured of your worthiness.

No one can demolish the truth with a smile or a scowl. The truth is that those mortals who incline to self-admiration are not generally numbered among those at the top of the ladder.

The climb is too strenuous. It is apt to soil the hands, tire the brain and weary the body, though there is payment made for all damages in refreshing sleep and a pleasurable power of excellence, the joy of which the simple self-admirer cun never experience.

Whatever qualifications the conceited may possess, their ever-ruling selfishness prevents them from recognizing good in others.

They are vain, envious, sufficient unto themselves, seldom to be found among the masters in any worthy calling where perseverance and stability of character play the leading role.

They court admiration, but stubbornly refuse to bestow it upon worthy friends.

To be admired is their chief purpose in life; indeed, it seems to be life itself. And herein lies the difference between them and the lofty aspiring souls, whose chief pleasure is found in doing good and bringing happiness to others, by praising and giving them encouragement, forgetting self-hudation, (©, 1923, by McClure Newspaper Syndicate.)
